OFFICE OF THE ADMINISTRATOR

Briefings

MEMORANDUM FOR: Mr. Carl Duckett

Dr. Newell has asked me to express his appreciation for the excellent briefing we received on March 1, 1968; he plans to stay in close touch with certain of the areas discussed that have a particular bearing on NASA programs. Let me add my own note of admiration made all the more profound in the light of the very short notice we were able to give.

To follow up on one point of the discussion, that of possible NASA contributions to your offices' needs, I am told that James C. Elms, the Director of our Electronics Research Center in Boston, has been approved for SI, T, and KH clearances. Since the work of ERC seems to parallel several of the areas of interest to Mr. Chapman's office, it might be useful for someone in his group to visit the Center to see if any of the ongoing work might have an applicability outside of NASA. We could help set up such a visit if you wished, or else your office could make such arrangements as would be most suitable; let us know if we can be of service.

Again, many thanks; yours is a most impressive program.
